STATE OF INDIANA

DEPARTMENT OF LOCAL GOVERNMENT FINANCE

INDIANA GOVERNMENT CENTER NORTH 100 NORTH SENATE AVENUE N1058(B) INDIANAPOLIS, IN 46204 PHONE (317) 232-3777 FAX (317) 232-8779

January 12, 2009

The Honorable Dennis G. Eaton Daviess County Assessor 200 East Walnut Street, Courthouse Washington, IN 47501

Dear Mr. Eaton:

RE: 2008 Annual Adjustment Ratio Study

The Department of Local Government Finance has reviewed the information and data you originally submitted for the Daviess County 2008 ratio study as well as the supplemental information. The Department hereby approves the ratio study results based on the study presented without verifying the actual data in order to allow the preparation and delivery of the real property list to the County Auditor pursuant to IC 6-1.1-5-14.

Further studies may be warranted in order to ensure that the annual adjustment process was followed. Additionally, we would encourage you to use all possible sales, which lend greater validity to the sales ratio study.

In conjunction with our Data Analysis section, please continue to ensure your sales disclosure file database is compliant. For assessment year 2009, your 2007 and 2008 sales disclosure data files must be compliant with the rules of the DLGF.

If you have any questions or concerns, please feel free to contact Barry Wood, the Assessment Division Director, at (317) 232-3762 or by e-mail at Bwood@dlgf.in.gov.

Timothy . Rushenbe Commissioner

cc:

Barry Wood, Assessment Director

An Overview of Daviess County's 2008 Annual Trending September, 2008

The following steps were taken to conduct the 2008 annual trending in Daviess County:

Step 1: Calculation of New Land Values

A local appraiser was contracted by the county to review all land values. Base land rates were adjusted accordingly per 2006 and 2007 sales. For residential property, small adjustments may have been made based on sales, but the market adjustment factor was the primary means of updating residential property values. For commercial and industrial properties, land values generally stayed consistent. Some market areas or some use types warranted influence factors; these factors were reviewed and adjusted accordingly.

Step 2: Calculation of New Residential Factors & Residential Studies

Per 50 IAC 14, a preliminary ratio study was conducted for vacant and improved residential at the township level. This study dictated which property classes required further analysis, stratification, reassessment or calculation of a new neighborhood factor. In some instances, especially in rural areas of Daviess County, the preliminary ratio study indicated that assessments were both accurate and uniform. In other neighborhoods, further review was required. This resulted in the calculation of new neighborhood factors. A sales comparison was also conducted calculating the percent change for improved residential sold properties and improved residential unsold properties.

Step 3: Updated Commercial & Industrial Improvement Values

New commercial and industrial cost table updates were the starting point for updating commercial and industrial improvement values. The county also changed the year of depreciation from 2006 to 2007. The Nexus Group Construction Cost Index (NCCIsm) was used to update these cost tables. These detailed construction cost models have been constructed by Nexus Group and applied uniformly by property class based on specific usage, wall type and other characteristics.

Step 4: Appeal Data

In addition to updating cost tables, utilizing current sales information, adjusting land values, information obtained through the 2007 appeals process, which included appraisal information, income/expense information, etc., was also used to establish values within the county for various property class types.

NOTES

Residential Improved Due to the limited number of sales, Bogard, Elmore and VanBuren Townships were grouped together for statistical analysis (a total of 20 sales were used for this statistical analysis)

Due to the limited number of sales, Harrison and Veale Townships were grouped together for statistical analysis (a total of 19 sales were used for statistical analysis) Residential Unimproved

Due to the lack of sales, all townships excluding Barr and Washington were grouped together for statistical analysis (A total of 28 sales were used for this statistical analysis)
Due to the lack of sales, all townships excluding Washington were grouped together for statistical analysis (A total of 32 sales were used for this statistical analysis) Commercial Improved

Due to lack of sales, all townships were grouped together for statistical analysis (additionally, the lack of sample size

is to small to conduct a Spearman test, indicating that the data does not statistically indicate assessment regressivity / progressivity (A total of 4 sales were used for this statistical analysis)

Industrial Improved Due to the lack of sales, sales from this category were grouped together with Commercial Improved - Washington Township for statistical analysis (A total of 2 sales were used in this statistical analysis) Industrial Unimproved

Due to zero sales, the statistical analysis of Commercial Unimproved - County Wide was used
